

*Escape into
Tranquility*

Trajjet
Where water comes home.

Step into the comfort-filled experience of a Trajet tub.

Trajet's customizable tub systems offer a full array of possibilities tailor-made to make the most of your bathing experience.

Trajet® Systems

Select the system and features that best fit your needs

■ **Classic** (Soaker) Soaking in a soothing tub of still water has long been the Classic solution to pamper yourself after a long day.

■ **Prodigy** (Whirlpool) Adding jets to the water heightens the sensations. Jets massage you at the lumbar, hip, ankle and feet.

■ **Meridian** (Whirlpool) The power of the Prodigy with even more luxury - Midway to Indulgence.

■ **Evolution TBM** (Whirlpool/Air Bath)

The Evolution TBM is a cleanable jetless system. TBM brings gentle, but powerful streams together from multiple Hydro-Ports to envelop your body in a soothing cushion of therapeutic relaxation. Trajet's TBM baths deliver bathing with unequalled cleanliness, the way nature intended. 99% Self Draining - Sanitizable - Easy Access Cleaning Ports

■ **TranquilAir** (Air Bath) Slip into tranquility, let the variable stream of bubbles surround you and caress away the stress.

Combination Add the soothing features of TranquilAir to any whirlpool system in most Trajet models.

How to choose the tub that's just right for you.

Create your own private sanctuary with a Trajet soaker, whirlpool, airbath or combination system. You control the built-in features that make your bathing experience as relaxing and therapeutic as a trip to the spa.

Choosing the right tub is as **easy as 1-2-3**. Simply pick your tub (shape, size and color), select your system, and choose your options.

But what if you aren't sure where to start? No problem, just close your eyes and picture yourself in the perfect bath. What do you hear? How does your new tub fit into the room you see?

Now, ask yourself these questions:

How deep is the water?

- Just under your chin
- Always under the shoulder
- Is there room for two or just you

The shape and dimensions of your Trajet tub will affect your desired water level and bathing experience. Whether you like the water level just under your chin, always under your shoulders, room to move or just submerge in, there is a tub design shape just for you.

What provides the ideal source of relaxation?

- Soothing still water
- Vigorous massage
- Caressing bubbles
- All of the above

Trajet offers six versatile comfort systems tailor-made to create your ideal mode of relaxation. Whether it's a classic soaking tub, a simple or indulging whirlpool, TranquilAir or a combination, simply select the system and configuration that will be your definition of tranquility.

What additional features would take you to bathing nirvana?

- Therapeutic colored light therapy
- Soothing AromaTherapy

You can add a number of healthful, spa-inspired options to your Trajet tub to enhance your bathing experience. Choose from Spectrum Chromotherapy and AromaTherapy.

Go ahead, dream for a moment. Trajet makes dreams come true with a wide variety of colors, shapes and sizes paired with unique bathing systems crafted to please our most discerning customer - You.

Therapeutic benefits of owning a whirlpool tub.

Recognized for the ability to relieve pain and improve the spirit, water therapy, also known as Balneotherapy, has been known for centuries. Until now, this incredible experience has been reserved for a select few and available only at luxury spas and resorts. A Trajet whirlpool tub brings this luxurious experience to your home for enjoyment and relaxation whenever you feel the need to make that personal, extraordinary escape to tranquility.

Bathing will never be the same

Sleep better

Your performance and activity is based on your ability to sleep at night. Bathing in a whirlpool at night will help alleviate tension and relax your body, making your body ready for a deep relaxing night of sleep.

Reduce Stress and Anxiety

A whirlpool bath relaxes your muscles, reduces anxiety and stimulates endorphin production, which is a natural substance that promotes a sensation of relaxation and pleasure.

Minimize pain in the muscles and joints

Using a whirlpool before or after vigorous activity helps the muscles and joints relax and reduce pain.

Lose weight and reduce cellulite

Research has proven that the whirlpool, when used daily, reduces the swelling and retention of liquids, promoting weight loss. Also, with regular use, the whirlpool helps diminish cellulite by relaxing the muscles, dilating the veins and improving the circulation stimulating the blood cells.

Help control diabetes

Scientific research has shown that patients with type-2 diabetes that used a whirlpool for 30 minutes per day, six days a week, reduced the level of sugar in their blood by 13%. After three weeks of the whirlpool treatment, they were able to lower their insulin dose by 18%.

Add a touch of Spa Treatment

Spectrum Chromotherapy

Whether it's the refreshing green of springtime or the serenity of a clear, blue sky, Spectrum Chromotherapy lighting by Trajet lights your water in vibrant hues, enhancing your bathing experience.

AromaTherapy

Energy, relaxation, romance, or tranquility—adding AromaTherapy fragrances to your Trajet bath will awaken your senses.

*It's called Balneotherapy.
You can just
call it "Ahkkh..."*
